# ARMY SPECIAL RULES

This section of the book describes all the different units used in a Grand Cathayan army, along with any rules necessary to use them in your games of Warhammer. Where a model has a special rule that is explained in the *Warhammer* rulebook, only the name of that rule is given. If a model has a special rule that is unique to it, that rule is detailed alongside its description. However, there are a number of commonly recurring 'army special rules' that apply to several Grand Cathayan units, and these are detailed here.

## CELESTIAL FORGED ARMOUR

Models with this special rule gain a Magical Ward (6+).

## HARMONY

Most of Grand Cathay's units are divided into two categories, Yin and/or Yang as described in the army list. Unless specified, models armed with missile weapons count as Yin, and models armed with only close combat weapons count as Yang.

A Yin unit counts as being in Harmony if it is within 3" of non-fleeing Yang units with a combined Unit Strength of 5 or more. A Yang unit counts as being in Harmony if it is within 3" of non-fleeing Yin units with a combined Unit Strength of 5 or more.

Yin units in Harmony may re-roll 1's To Hit with missile weapons. Yang units in Harmony may re-roll 1's To Wound in close combat.

## MASTERY OF THE ELEMENTAL WINDS

Models with this special rule gain a +1 casting bonus if there is one or more other friendly non-fleeing models with this special rule within 12".

## WILL OF THE DRAGONS

A unit with this special rule may re-roll failed Panic tests caused by friendly units breaking from combat or getting destroyed within 6" of them, or when it is fled through by a friendly unit.
