ARMY SPECIAL RULES

This section of the book describes all the different units used in a Vampire Counts army, along with any rules necessary to use them in your games of Warhammer. Where a model has a special rule that is explained in the *Warhammer* rulebook, only the name of that rule is given. If a model has a special rule that is unique to it, that rule is detailed alongside its description. However, there are a number of commonly recurring 'army special rules' that apply to several Vampire Counts units, and these are detailed here.

BLOODLINES

Most Vampires belong to a certain Bloodline, such as von Carstein, Necrach, Lahmian, Blood Dragon or Strigoi. Characters belonging to one Bloodline may not join units belonging to another Bloodline, nor may two characters from different Bloodlines join the same unit.

THE GENERALS OF UNDEATH

If your army contains any Undead units, you must include at least one character that is a Wizard that uses the Lore of Necromancy.

Slain General

At the end of the phase in which the General is removed as a casualty, and at the start of every friendly turn thereafter, all friendly Undead units (excluding mounts) on the battlefield must take a Leadership test. If the test is failed, the unit immediately suffers a number of Wounds equal to the amount by which it failed the Leadership test, with no saves of any kind allowed. These Wounds are distributed as if from a shooting attack.

If, at the start of any of your turns following the death of the General, there is one or more friendly Wizard Characters on the table who know spells from the Lore of Necromancy, no unit in the army needs to take this Leadership test while at least one of them remain.

Battle Standards

In addition to the normal rules for the army battle standard, units of Undead within 12" of their battle standard suffer D3 Wounds less than they normally would due to the Unstable special rule, or following the death of the army's General.

Characters and Units

Characters who are not Undead may join Undead units despite not being Unstable themselves. Mounted Characters ignore the Undead special rule of the mount. If an Undead unit would get destroyed as a result of Unstable, any remaining character(s) will need to take a Break test as normal the same phase, using the Leadership modifier that they lost the combat by.

DEATH SHRIEK

A Death Shriek is a special attack that can be used against a single unit in the Shooting phase, even if the model has marched, charged, or the target is engaged in close combat. This attack has a range of 8" and needs line of sight to its target. If the model is engaged in combat, its Death Shriek may target a unit in base contact.

To resolve a Death Shriek, roll 2D6+3. For each point by which the result exceeds the target unit's Leadership, the target unit suffers 1 Wound which Ignores Armour Saves. Death Shriek is a non-physical Magical Attack and Wounds suffered from it are distributed as if from shooting.

MASTER OF THE DEAD

A model with this special rule can use the *Invocation of Nehek* spell from the Lore of Necromancy to increase units of Skeleton Warriors and Skeleton Archers beyond their starting size.

THE RED THIRST

Roll a D6 at the end of each Close Combat phase in which one or more models was slain by a Vampire with this special rule. On a 5+, the Vampire recovers a single Wound, up to their starting value (excluding additional Wounds from mounts). This does not work against Animated Constructs, Daemons, Spirits or Vampires.

SPECTRAL STEEDS

Mounted models with this special rule gain the Ethereal special rule for the purposes of movement only. They do not suffer the movement penalty for being barded. Whilst a unit with this special rule is joined by a character without the Spectral Steeds or Ethereal special rules, it loses this special rule.

UNDEAD

All models with the Undead special rule have the Animated Construct, Fear, and Unstable special rules. In addition, they ignore the Independent special rule. However, they may make march moves if they are within the Army General's Inspiring Presence range or are joined by a character with the Lore of Necromancy.

VAMPIRIC

Models with the Vampiric special rule have the Fear and Immunity (Psychology) special rules. In addition, models suffer a -1 penalty To Wound rolls against them, unless they are using Magical Attacks or Flaming Attacks. However, Vampiric models treat all rivers as Deadly Terrain unless they are mounted.

THE LORE OF NECROMANCY

THE CURSE OF UNDEATH

Lore Attribute

When a spell from the Lore of Necromancy is successfully cast, all Undead units (excluding mounts) within 6" of the caster regain 1 Wound (Core Units regain D3 Wounds) following the rules for *Invocation of Nehek*.

CURSE OF YEARS

Level 4

Remains in Play. *Curse of Years* is a **hex** spell with a range of 18". The model will direct its attacks against his own side. The model cannot be attacked by either side in that Close Combat phase but, after combat resolution has been worked out, it reverts immediately to the original player's control and can therefore use his Leadership for any Break tests and can be broken and pursued as normal.

If the model has no friendly models in base contact, it is unable to attack in that Close Combat phase and all attacks directed against the victim will hit automatically.

- **Necrofex Colossus Special Attacks:** A creature of nightmarish power and massive stature, a Necrofex Colossus can make one of a number of attacks in close combat. When it is the Necrofex Colossus' turn to strike in close combat, roll a D6 and consult the table below to determine what kind of attack it will make:

D6	Result
1-2	Batter and Slash: The Necrofex Colossus fights using the Random Attacks (D6+1) special rule.
3-4	Impale: Select one model in base contact; that model, and all models in the same file, must pass an Initiative test or suffer a Strength 7 Hit with the Multiple Wounds (D6) special rule.

CREW: 3 Pallid Handmaidens (Vampire, Lahmian)

DRAWN BY: 1 Spirit Horde (Undead, Spirit)

BASE SIZE: 50x100

EQUIPMENT: Hand weapon

SPECIAL RULES: Fly (7), **Magical Attacks** (Spirit Horde only), **Magical Ward (4+)**, **Random Attacks (2D6)** (Spirit Horde only), **Spectral Steeds**, **Terror**, **Vampiric**

- **Battle of Wills:** Immediately before the first model in an enemy unit rolls To Hit against the Coven Throne (either in close combat or shooting), the opponent must roll a D6 and add it to their unit's Leadership. Next, roll a D6 and add it to the Coven Throne's Leadership. To find the result of the Battle of Wills, subtract the enemy's total from the Coven Throne's total, and apply the result to the table below – the results last until the end of the turn.

Result:	Effect:
0 or less	Back off, Devils!: No effect.
1-2	Must... Resist...: The enemy is at -1 Weapon Skill and -1 Ballistic Skill. Artillery weapons that do not roll to Hit must roll a 4+ on a D6 to be able to shoot.
3-5	Bewitched: The enemy must re-roll successful To Hit rolls. Artillery weapons that do not roll to Hit must roll a 4+ to be able to fire.
6+	Completely Enthralled: Every model in the enemy unit makes a single close combat attack, resolved against its own unit. Roll To Hit, To Wound and take saves as normal. The caster may choose which of the unit's weapons is used for these attacks. Parry or Dodge saves do not apply, and neither do any special rules that only apply in the first round of close combat. Affected units may not otherwise shoot or attack this turn.

- **Scrying Pool:** Enchanted Item. Bound Spell (Level 1, cast on 5+). This is an **augment** spell that targets the Coven Throne. All crew (including any characters mounted on it) may re-roll all failed To Hit and To Wound rolls for the remainder of the turn.

CREW: 1 Corpsemaster (Human), 3 Banshees (Undead, Spirit)

BASE SIZE: 50x100

EQUIPMENT: Hand weapon

SPECIAL RULES: **Death Shriek, Fly (7), Magical Attacks** (Spirit Horde only), **Random Attacks (2D6)** (Spirit Horde only), **Regeneration (4+), Spectral Steeds, Terror, Undead**

- **The Reliquary:** At the start of each of your turns, roll 2D6 and add the current turn number. This is range of the reliquary's dark aura this turn in inches. All enemy units within range of the dark aura immediately take D6 hits, with a Strength equal to the current turn number, distributed as from shooting. Also, place a marker next to all friendly Undead units that were within range of the dark aura at the start of the turn. These units improve their Regeneration saves by one point until the start of their next turn, to a maximum of 4+. If they have no Regeneration save, they are treated as having the Regeneration (6+) special rule instead. Finally, if the 2D6 result was a double, then the fell energies prove too powerful; in addition to the usual effects, the Mortis Engine takes 1 Wound with no saves of any kind allowed. When the Mortis Engine suffers its last unsaved Wound, every unit within 12 plus the turn number in inches, friend or foe, must take 2D6 hits with a Strength equal to the current turn number. These hits are distributed as shooting.

NOTES:

- A Mortis Engine has a Line of Sight value of 5.
